**17-155.1** Mr White from Yorkshire Water spoke at the meeting to discuss issues with drainage in Linton on Ouse and answered questions.

A resident explained problems she has experienced with water drainage in Linton for many years. Mr White is the new engineer for the area. He explained known issues from the past with fat build-up; he deals mainly with fowl water removal and explained that he is not sure about rain drainage. Cllr Goddard pointed out the historical issue and asked if there was a plan; Mr White referred to the flatness of the area making drainage difficult, he confirmed he will check with planning about plans for area. He explained that YW are consulted about new connections but not at the building application stage, YW cannot refuse connection but they will not allow plans that mix surface and fowl water. Cllr Keegan asked about the possibility of the replacement of sewers, Mr White replied that this would cost too much; Cllr Keegan asked if this could be strongly considered. Cllr Goddard asked if it could be kept on the agenda and for Mr White to return to us with an action plan. Mr White pointed out that that YW inherited the existing drainage water system but there were historical problems that they did not have full knowledge of. Mr White is going to check about ensuring cyclical visit is made by YW in this area, and will check that businesses such as the pub and the RAF base are doing what they should in terms of fat traps etc. He pointed out that he does not deal with the sewage treatment works so can't reply to any queries on that. YW have a do's and don'ts lost re what goes down toilet,

RESOLVED: The Clerk will put the YW list on the forum.
